Warranty Information

The benefits to the consumer under the warranty are in addition to other rights and remedies of the consumer under a law in relation to the goods or services to which the warranty relates.

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to major failure.

All expenses related to warranty claims are the responsibility of the consumer making the warranty claim. To download full warranties, please visit www.embelton.com.

Care & Maintenance

Caring for your Design Oak laminate flooring is easy. Vacuum or sweep the floor to remove dirt and debris, and use a slightly damp (but not wet) mop for regular cleaning. For preventative care, entrance mats and rugs in high wear areas should be considered, together with felt protectors for furniture and appliances.

Floors for the Perfect Moment

German-engineered Oak Laminate Flooring

Stylish, with just the right amount of character

With a compact range of decors, perfectly harmonised details and sophisticated technologies, Design Oak laminate flooring brings life to any room, and is suitable for all requirements. From trendy to classic interiors, for residential or commercial applications, and for light or heavy traffic, Design Oak combines ultimate quality with tasteful design.

Wideboard format in stunning oak colours

Oak is one of the world's most loved timbers, and is famed by architects for its fine grain structure, which lends itself to excellent staining opportunities. Embelton has chosen six of the most popular stains to match a wide range of Australian interiors. Choose from one of the darker colours to match a particular interior style, or go for a lighter colour that allows for more versatility in your room design.

Suitable for rooms of most sizes, the wideboard format of Design Oak laminate flooring will help to make your room appear larger, creating a feeling of extra space.

Looks and feels like real timber

Long panels and a wood hue give Design Oak the genuine look of a natural Oak timber floor. And thanks to the latest cutting-edge pore technology applied during the manufacturing process, the surface feels just like Oak wood grain to give an authentic and comforting feel underfoot.

Superior German Manufacture

Design Oak laminate is a floor of high quality. It is robust, durable and easy to care for. Manufactured in Germany at one of Europe's most sophisticated production lines, every floorboard is automatically registered in the production process, and passes through several inspections to ensure it will retain

its beauty and value for years to come. And as with all Embelton floating floors, it is backed by our extensive 25 year domestic and 10 year commercial warranty.

Quick and Easy Installation

The patented "Just Clic" locking system allows for quick and easy installation. The boards are light and sturdy, and click together with ease to create a tight joint binding the floor together, and allowing it to move as one.

While we always recommend Embelton floating floors are installed by professional flooring contractors, Design Oak laminate flooring can be laid by those with DIY skills, please see installation instructions in each pack for your reference.

Floors for the Perfect Moment

Hygienic

Easy to clean and maintain, laminate flooring is one of the most hygienic flooring solutions.

Environmentally Friendly

HDF core is made from natural wood fibres sourced from certified sustainable forests.

Shock Resistant

More so than timber floors, Design Oak is able to withstand the impact of heavy objects without leaving impressions in the floor.

Abrasion Resistant

The robust top surface layer protects and is able to withstand scratches and abrasions, maintaining its appearance for years to come.

Natural

Keep it Quiet with Embelton Flooring Underlays

Hush Platinum Underlay

Hush Platinum is a good quality, high density, affordable 2mm thick underlay, suitable for use under most floating floors. Utilising a peel and stick moisture film, it incorporates a 0.6mm damp-proof sheet designed to create a barrier, keeping installations costs down. Complying with the BCA code on noise transmission, it offers an acceptable acoustic performance. Impactamat Acoustic Rubber Underlay should be considered if a higher acoustic performance is required.

ImpactaMat Acoustic Flooring Underlay

Embelton's premier acoustic underlay. Made from recycled rubber and bound together with a waterproof flexible binder, ImpactaMat is proven to achieve significant reductions in structure-borne noise, while also offering reductions in airborne noise (reflected noise in a room). It is versatile, easy to lay, and can be glued down or loose laid underneath tiles, timber, bamboo, laminate, cork, concrete screeds and even carpet.
